Managing Transformation of Indonesia Transport System

Prof. Suyono Dikun
University of Indonesia

Three issues of managing transformation

1. **Revitalization Indonesia transport system for the next five years**
2. **Linkage between the development of transport system and regional development strategy**
3. **New strategies to strengthen transport system.**

Revitalizing transport in next 5 years

1. Continue implementing transport policy and institutional reforms
2. Continue building national strategic transport projects
3. Accelerate and Increase private sector participation

Building linkage with regional development

1. Shift economic development from sector-based to regional/spatial-based
2. Implement HITS principle
3. Implement Money Follows Program principle
4. Engage in spatial based transport investment/financing

Strategies to strengthen transport system

1. Build a close linkage between transport and economic development
2. Let private investment play a much greater role
3. Build consistency and integration with energy and telecommunication sectors
4. Build synchronization between transport and spatial plan to achieve system optimization.

Trajectory of the future

Disruptive Technology and Innovation

2019
The end of RPJMN III. Jokowi administration has built transport infrastructure rather massively.

2020
The beginning of RPJMN IV. Several large-scale transport infrastructure are expected to be in operation, enhancing transport system supply significantly

2025
The end of RPJPN. Assuming a political stability, consistency, infrastructure will have to reach an integrated and reliable manner all over the country

2045
The Centennial Year of Independence. Indonesia will be one of the biggest economy in the world. Transport infrastructure and services will fully support the economy and become an integral part of the economy.

The Trajectory of the Future. It is exponential because we are now in the exponential era. Linear will not do any good any more. The speed and determination to build infrastructure demonstrated by the current government need to be continued.
