Jakarta, 10 August 2017
Economic inequality in Indonesia has been on the rise over the past 10 years. Despite having a relatively stable level of income inequality during the period from 1960 to 1990, in the aftermath of the 1997 economic crisis income inequality has exhibited a significantly positive trend.
Ninety-five percent of thought, emotion, and learning occur in the unconscious mind--that is, without our awareness,

--- Gerald Zaltman ---
INEQUALITY AND CORRUPTION
