Fighting Inequality for Better Growth

Jakarta, 9-10 August 2017

A wide-angle photograph of a lush green landscape, likely a rice terraced field in a mountainous region. The foreground is filled with the hands of three people, each holding a small pile of light brown coffee beans. The background shows rolling hills covered in dense green vegetation under a clear sky.

LET'S GO EAST

Hermien Y. Kleden, Wartawan TEMPO

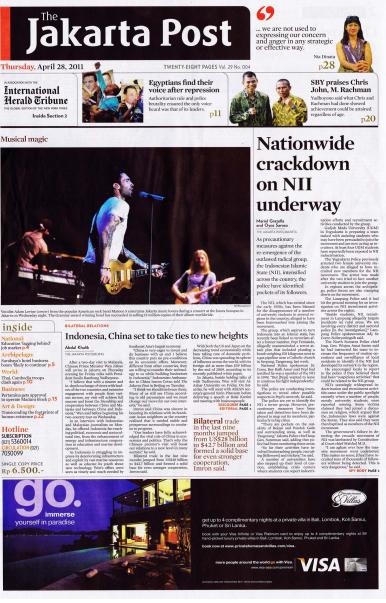

- Minat baca anak **INDONESIA 0,01** persen atau hanya **1** dari **10.000** anak suka membaca (data UNESCO).
- **INDONESIA** peringkat **60** dari **61** negara dalam minat baca. Finlandia peringkat 1.
- **Nusa Tenggara Timur** – minat baca rendah atau akses buku minim?

- Anak **Finlandia** membaca sekitar 178 buku per tahun.
- **Finlandia** menerbitkan lebih banyak buku anak-anak daripada negeri mana pun di dunia.
- **Finlandia** negara termakmur di muka bumi.

Tuomas Uusheimo, Andreas Meichsner / archdaily.com

- Posisi **media**: jadi garda depan pendidikan gratis literasi.
- Di Indonesia Timur, NTT khususnya, informasi memicu tumbuhnya komunitas ekonomi kecil.
- Perserikatan Bangsa-Bangsa menetapkan lima literasi: membaca, menulis, keuangan, sosial, moral. Literasi **membaca** ada di baris depan.

Nationwide crackdown on NII underway

provisions, including the emergence of the National Internet Information Center (NII) in Indonesia. The NII has been established across the country, with its headquarters in the capital city of Jakarta. The NII's mission is to regulate and monitor the use of the Internet in Indonesia, and to promote the development of the Internet as a tool for social and economic development. The NII is also responsible for coordinating the efforts of various government agencies and private sector entities to ensure the smooth operation of the Internet in Indonesia.

The NII has been established in response to the growing concerns over the use of the Internet in Indonesia, particularly regarding the spread of fake news and disinformation, and the impact of the Internet on the economy and society. The NII is also intended to address the challenges posed by the rapid growth of the Internet in Indonesia, such as the need for better infrastructure, regulation, and coordination.

The NII is a significant step forward in the development of the Internet in Indonesia, and will play a crucial role in ensuring that the Internet remains a safe, secure, and accessible space for all citizens.

Amartya Sen, Pemenang Nobel

“Famines are rarely the result of a lack of food. They are more usually the consequence of a breakdown in people's ability to access or produce food in the way that they usually do.”
